

## Sustainability Statement

As a responsible contractor, Coombs and Partners is committed to the protection and enhancement of the environment. We endeavour to maintain the highest environmental standards in all of our activities and conduct our operations in a way that demonstrates genuine corporate care for the environment.

We also recognise that excellence in environmental performance not only benefits the community at large but also makes an effective contribution to our own business. For example, we appropriately identify all environmental issues at the outset, undertake risk assessments, establish appropriate environmental management plans and ensure that such plans are properly implemented.

Within our office(s) we encourage all staff to travel sustainably, purchase sustainably, avoid unnecessary waste, recycle goods as far as is practically possible, to minimise the use of energy, and to raise awareness of this policy.

Wherever possible we engage local businesses, employ local labour and utilise local materials to minimise the need for transport and assist the local economy.

As part of our input to the assessment, design and build process, we work with other parties involved to incorporate sustainable features into projects as a priority.

A handwritten signature in black ink, appearing to read "RJ Barwick", with a horizontal line extending to the right.
